

[Vilicotel - Hotel Soft](#)

VILICOTEL (lat. "vilico" = "Governor .."), the new hotel management software in Windows® version, is the application you need in your hotel or pension. VILICOTEL is more than one application. It is a modern solution that connects the hotel management and the promotion activity of your services. This is achieved through the web portal that VILICOTEL interacts with.

The program, tested in time by our clients, has been updated and modified to meet all their requirements, becoming a powerful administration and management tool. It is also open to any requests and can be adapted to any working conditions, from the smallest pension up the most sophisticated hotels.

This advanced solution for front desk, combined with the opening of the Internet is offered at an attractive price, adapted to your business needs and size.
