If we aren't so bad in the problem of infrastructure, and if the tourits that come along, plain about their busted vehicles because of our roads, full of holes, The Ministry of Regional Development and **Tourism(MDRT**), wants to set up a **national** trail system **of cycle**, in the arias with landscapes and low traffic.

A project like this was taken as issue since 2008, when there were various talks concerning the fulfilment of ten highway cycles on road, and another eight mountainous routes for the **bicycle tourism**

fans.

Acording the bill-law elaborated of **MDRT** and presented by Mediafax, for the normal passing-by, there will be needed from 5 to 12 days, if we refer to **national cycling routes**

, 2 to 5 days in the case of regional routes and utmost one day for the local ones.

These **routes** will be created in such way to be as spectacular as possible, in the sense of landscapes, with low traffic, on roads with aspfalt or unmodernised ones.

Macording to the draft-law, in Romania there already exists an increased interest and wish for **b icycle**

trails marked and approved, and the money used to create this will come from granted community founds or from other external sources.
